

CAREER OBJECTIVE

Python & DevOps Engineer with 3+ years of experience in building scalable applications. Worked in Agile methodology. Had been Scrum Master in my team for 3 years. Skilled in Python, Scrum, AWS, and data engineering. Seeking opportunities as Scrum Master, Gen AI/ML, Data Science or DevOps.

PERSONAL DETAILS

Age	29
Nationality	Indian
Status	Married
Residence	Nagarbhavi, Bangalore
Hobbies	Travelling, Learning new things & Music

TECHNICAL SKILLS

- PythonDjangoFastAPI
- AWS Docker Kubernetes
- JenkinsGitHub Actions
- TerraformSQLRedis
- ElasticsearchGrafanaSplunk
- Vue.jsC#ASP.NETGo
- PySparkDatabricks

SOFT SKILLS

- Team PlayerEager to Learn
- CommunicativeFlexible
- AmbitiousStrong Writing
- Scrum Master

RELATED COURSES

ABC Technologies | (MAY 2021 - JAN 2022)

Java Full Stack Development
OOPS, JDBC, Servlets, JSP, Spring

Python Full Stack Development
OOPS, Multiprocessing, Multithreading, Django, Flask

EDUCATION

KLE Nijalingappa College (Bangalore University)
Master in Computer Applications (DEC 2017 - DEC 2019)
Internship: Three Layer Privacy Preservation on Cloud Computing using Fog Server - Java
CGPA: 7.23

Vasavi College (Bangalore University)
Bachelor in Computer Application (SEP 2016 - SEP 2017)
CGPA: 7.15

POOJA NIRANJAN SHETTY

Platform Engineer · Distributed Systems · Python/Go

- Website
- LinkedIn
- GitHub
- poojaniranjanshetty@gmail.com
- +91 9916073885

Platform Software Engineer with 3+ years designing low-latency, scalable distributed systems. Expertise in **Python, Go, Kubernetes, Docker, and AWS** – building high-performance inference serving stacks and data pipelines. Led CI/CD migration to GitHub Actions, reducing deployment cycles by 75%. Architected real-time streaming services handling 1M+ daily requests. Strong background in **observability (Grafana, Splunk, Elasticsearch)**, clean code, and technical leadership. Passionate about machine learning infrastructure and model serving.

PROFESSIONAL EXPERIENCE

Python Developer (tv.kpn.com)AUG 2023 – APR 2025
KPN · Amsterdam, Netherlands

This team maintains the backend of KPN TV. We are a team of 4 with some Java developers, Frontend Developer and me as a Python Developer.

- Engineered "Maxmind" geolocation service (Python, FastAPI) that validated **1M+ daily requests**, ensuring 100% compliance with EU content broadcasting regulations.
- Developed "Jafar" streaming integrity system that eliminated duplicate playback across devices, reducing customer complaints by **25%**.
- Automated VM storage cleanup with "Nasblean", cutting manual maintenance by **40+ hours/month** and improving storage efficiency by 15%.
- Spearheaded migration from GitLab/Jenkins to **GitHub Actions**, reducing deployment cycles from 2 days to 8 hours (**75% reduction**).
- Managed customer operations requests through Opsgenie system.
- Created Ansible scripts in Linux to perform insertion and deletion of recording via cronjob.
- Collaborated on Reflector (generates the URL for user to connect to videos), TLSDB certificate renewal, and live-channel-generator, contributing to smoother live TV experiences for **500k+ users**.

Tech Stack: Python (Django, FastAPI), Jenkins, Groovy, CI/CD, Docker, Ansible, Linux, DevOps, GitLab, Redis, Kubernetes, Jira, ServiceNow, AWS, ElasticSearch, Splunk, Grafana, Jfrog, Sonarqube, Checkmarx

Software Engineer (D-Nitro)APR 2022 – AUG 2023
KPN · Amsterdam, Netherlands

Developed CI/CD enhancement applications for company developers, gaining exposure to various tools while delivering high-quality, future-proof solutions.

- Engineered the "Console" front-end (Vue.js) with a Django backend, streamlining developer workflows and improving interface performance.
- Developed "Katka-development" orchestration tool using Typer CLI for multi-repository management, reducing manual setup time by **50%**.
- Managed and optimized **100+ Jenkins instances** across 12 EC2 servers, improving CI/CD pipeline reliability and uptime.
- Maintained enterprise tools including Slack, Katka, LDAP, Jenkins, BitBucket, and SonarQube, ensuring seamless daily operations for developers.
- Built asynchronous Python applications with automated CI/CD triggers, accelerating deployment frequency and reducing human error.
- Implemented automated SNOW ticket creation and release versioning, cutting release preparation time and improving audit traceability.

Tech Stack: Python (Django, AIOHTTP, Pytest), JavaScript (Vue.js, Jest), Jenkins, Groovy, CI/CD, Docker, DevOps, Bitbucket, Redis, Kubernetes, Jira, ServiceNow, ElasticSearch, AWS, Ansible

ASP.NET DeveloperNOV 2020 – APR 2021
Enrich Techno-soft · Bengaluru, India

Full-stack development for travel portal with comprehensive booking services and multilingual support.

- Engineered responsive front-end for hotel, car rental, and flight booking modules, enhancing user experience across desktop and mobile devices.
- Developed robust RESTful APIs for booking transactions and payment processing, ensuring **99.9% uptime** and secure data handling.
- Implemented multilingual support (English/Arabic), expanding portal accessibility to a wider international audience.
- Integrated PCI-compliant payment gateways, reducing transaction failures and boosting customer trust.
- Designed and optimized SQL Server databases for bookings and user management, improving query performance by **30%**.

Tech Stack: ASP.NET, C#, MVC, CSS, HTML, JavaScript, SQL Server, REST API

Programming TrainerJUL 2018 – OCT 2020
Capital Computers · Bengaluru, India

- Designed and delivered comprehensive programming curriculum across Python, JavaScript, HTML/CSS, SQL, enhancing student proficiency and practical skills.
- Conducted hands-on coding exercises and real-world projects, improving student problem-solving abilities and project readiness.
- Implemented assessments, certifications, and career guidance programs, boosting student placement success.
- Mentored **100+ college students**, fostering technical knowledge, critical thinking, and industry-ready skill sets.

Freelance & Continuous UpskillingAPR 2025 – PRESENT
Bengaluru, India

- Advanced cloud & ML platform engineering: PySpark on Azure Databricks, Django REST API, and LLM inference fundamentals.
- Freelancing for small businesses – building scalable backend services and automation pipelines.
- Active GitHub portfolio with hands-on projects in Go, Python, and distributed systems.

EDUCATION & CERTIFICATIONS

MCA – KLE Nijalingappa College, Bangalore University (2017–2019) | CGPA: 7.23

BCA – Vasavi College, Bangalore University (2014–2017) | CGPA: 7.15

Java & Python Full Stack Developer – ABC Technologies (2020–2022)

- Databricks Certified Data Analyst – 2026
- Microsoft Azure: Zero to Hero – 2025
- PySpark on Azure Databricks – 2025
- Django REST API Advanced – 2025
- Go: The Complete Developer's Guide (in progress)

PROJECTS

99acres-scrappers – Bengaluru Property Market Dashboard

github.com/poojanshetty/99acres-scrappers

- End-to-end data analytics pipeline: raw 99acres listings → cleaned dataset → interactive Streamlit dashboard
- Processed 412 raw records, removing duplicates and standardizing price (lakhs/crores), area (sqft), and BHK data
- Engineered key features: price_per_sqft, local_value_score, enabling fair property comparisons
- Built interactive dashboard with filters, charts, and data export – demonstrates data acquisition, cleaning, EDA, and visualization
- Tech Stack:** Python (pandas, NumPy, Plotly), Streamlit, Regex, KaggleHub API

scrapy-numbeo – Cost of Living Data Scraper

github.com/poojanshetty/scrapy-numbeo

- Built a Scrapy spider to extract city-level cost-of-living data (food, rent, utilities, transport) from Numbeo
- Structured raw scraped data into clean CSV output for analysis and visualisation
- Tech Stack:** Python, Scrapy, Web Scraping, Data Extraction

live_language_translator – Speech-to-Text Translation App

github.com/poojanshetty/live_language_translator

- Real-time speech recognition and translation app – captures spoken input and outputs translated text + audio
- Supports translation across 130+ languages with text-to-speech playback
- Tech Stack:** Python, SpeechRecognition, GoogleTrans, gTTS, PlaySound

AI-Powered Docker Image Size Optimizer

github.com/poojanshetty/AI-Powered-Docker-Image-Size-Optimizer

- Analyses Dockerfiles and provides actionable recommendations to reduce image size and improve build speed
- Runs locally with GPT4All (Llama 3) – keeps your Dockerfiles private, no API costs
- Tech Stack:** Python, GPT4All (Llama 3), Docker, Jinja2, Click

More projects on GitHub: github.com/poojanshetty

KEY STRENGTHS

- ✓ Go & Python
- ✓ Low-latency Distributed Systems
- ✓ Kubernetes & Docker
- ✓ AWS & Azure
- ✓ Observability (Grafana/Splunk)
- ✓ ML/LLM Inference
- ✓ CI/CD
